J1.50-3.00EX 2

ELECTRIC COUNTERBALANCED TRUCK

1500-3000 KG

ABOUT HYSTER®

Hyster Company is a part of the NACCO Materials Handling Group, a global leader in the industry with manufacturing and technology centres in 12 locations around the world producing quality components and assembling complete trucks for markets such as the fast growing Asia-Pacific.

The Hyster® J1.50-3.00EX 2 Electric Counterbalanced Truck has the following benefits:

- Load handling speed and performance ranked as top of its kind in the industry
- Excellent visibility with a redesigned mast
- Long wheelbase, low profile tyres and a heavy battery set (DBB) increase machine stability
- Short turning radius to improve access and manoeuvrability in tight spaces
- Ergonomic features for operator comfort
- Aftermarket service and support

Hyster products are distributed and supported through an extensive network of exclusive dealers who provide local coverage through their sales and service locations across Asia and Pacific regions. Distribution partners were selected on the strength of their customer support capability and outstanding service ethic to bring quality products, sales consultancy and aftermarket services to customers in their local markets.

J1.50-3.00EX 2 - FEATURES

IMPROVED VISIBILITY THROUGH THE MAST

Inner mast has been widened to create an open view.

LOAD WEIGHT METER

Displays the weight of the load when the machine is stationary.

CARRIAGE LIGHT*

Direct light on load and racks illuminates the work area when picking stock at different heights.

POSITIONING LASER*

Laser positioning assists in the correct placement of the forks into the pallet.

WIDE TREAD/LOW PROFILE TYRES

Enhanced circling stability.

OPERATOR COMFORT

Large cab with high head clearance and legroom for operator comfort.

TRAVEL & LOAD HANDLING INTERLOCK

Operator presence is detected by a seat sensor. Operations are locked (disabled) when the operator leaves the seat.

DROP BATTERY BOX (DBB)

Enhanced driving stability by placing the battery in the lower and rear part of the truck.

LATERAL STABILITY

The new stability system reduces truck sway during turns.

*Optional feature.
