

Delivery Service Robot

Food Delivery Service Robot

Three Modes

Delivery Mode

- Multi-point delivery service
- 24h service
- Always on call

Reception Mode

- Leading the way
- Smart interaction
- Directing the customers

Cruising Mode

- Food delivery
- Returning to original location
- Guest interaction

Delivery Service Robot

We always believe

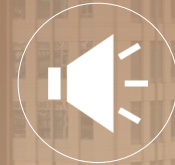

A simple and repetitive work of delivering task can be completed by robots, so that all service personnel can be freed from repetitive labor to provide services to guests in a better state with a more relaxed mentality.

Seeing the countless possibilities of intelligent services!

4 Functionalities

Multi-order food delivery

Cruising food delivery, Informational Publicity

Smart Reception, Leading the way

Entertaining interactions, Heartwarming services

Delivery Service Robot

- Non-stop cruising room service to save manpower
- Automatic transportation of all kinds of food (snacks, drinks, dishes, etc.)
- Contactless delivery

Restaurant

Placing food on delivery robots

Select a delivery location

Robot automatically delivers food to the table, Voice notification to inform waiter to pick up meals

Delivery Service Robot

Five highlights

1 Plug and Play for rapid deployment

Easily deploy after quick installation of robot and respective charging station

2 Conduct multiple load deliveries at multi-point

With the robot carrying up to 15kg per layer, conduct as many deliveries or transport as you can in a single setting

3 Autonomous navigation and obstacle avoidance

With 3D lidar sensor and multi-sensor fusion, the robot has 360(degree) situational awareness for accurate navigation and obstacle avoidance

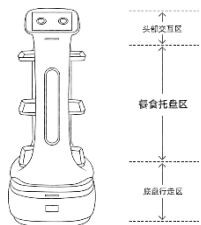

4 Multi-modal interaction, humanized experience

Voice interaction, UI interaction

5 Long operation capability

The robot comes with 10-12 hours of battery life

Delivery Robot Specifications

48.6*55.6*127cm

Product size

60kg

Product weight

30Ah

Battery capacity

3-4 layers

Number of tray layers

10kg

Tray bear loads

56*44cm

Tray size

0.6~0.8m/s

Moving Speed

<2°

Climb angle

< 2.5cm

Obstacle avoidance

8h Rechargeable

Battery life

4h

Charging time

24V

Battery rated voltage

Delivery Service Robot

Competitor analysis

Delivery Service Robot

Other brands of robots

Deploy

Plug and play for easy deployment. Set the robot with its charging station and it is ready to go.

Other delivery robots may require complicated installation methods like setting

Operate

Easily operation – call robot by voice

Manual and cumbersome user interface, with many steps to execute to perform a function

Functions

On top of delivery, the robot has interactive functions to engage with customers.

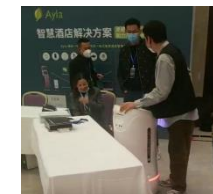

Robots are only for food delivery. Not suitable for other functions.

Performance

Smooth and stable obstacle avoidance ability with 3D lidar and 6 wheel motion

Obstacle avoidance ability not as stable with 4 wheels
