KDE6500TN

KDE30T3D

- High-efficient combustion system ensures sufficient combustion; muffler reduces exhaust noise greatly; engine noise is isolated in double structure & absorbed by special lining.
- All operation functions of the generator set are on the control panel, with a digital readable display showing operation time, output voltage and current. Breakers can protect generator set from overload damage.
- Excitation mode is self excitation and constant voltage (with iAUR); all generator is diesel type.
